

Can't find the eBook you are looking for in Wisconsin's Digital Library?

You can now recommend titles to the library using a **“Recommend to Library”** feature. To use this feature, first login to your account and perform a search for the title or author in the Wisconsin's Digital Library (dbooks.wplc.info). If your title is not listed in the Library Collection, click on **Additional titles to recommend** under the Availability filter on the left. You can then see all available titles in the OverDrive collection, including those that the library has not yet purchased. These titles will be indicated by the **“Not Owned”** ribbon at the top of the title. Click on **Recommend** to send the recommendation.

Please note that the library can only purchase materials on this list of additional titles. Titles not on this list are most likely absent because of publisher restrictions. After clicking the “Recommend” link, you will see a popup window that looks like this:

You can choose to be notified by email if the library decides to purchase your title and also be placed on the waitlist when the title is purchased. Click “Recommend this Title” to finish the process. Please keep in mind that recommendations are not a guarantee that the library will purchase the title and are subject to factors such as available funds.
